## Instructions

1) Print both pages at 100% or 'fit to page'. It doesn't matter which, just as long as the pages stay proportional. Use card stock or photo paper for strength.

2) Cut along the dark lines, fold along the dashed. Leave some room for the bottom of the feet, you'll level them later.

3) Fold the sides of the head first, hook them together and tape. Then fold the back down.

4) Fold the body, feed the arms through, tape the back. Cut the bottom of the feet so he stands level.

5) Cut out, fold the coat and put it around him.

This is a promotional freebie version. Print it out, print another for a friend, print a army of them (wouldn't mind seeing that). If you want to send the pdf to a friend, that would probably be alright too. Just don't charge anyone for it, reproduce it for distribution, don't try to sell them yourself, etc, etc.

I'll probably have a final version for sale (cheap) sometime later. Maybe a 3.0 version with a hat and backpack. Have fun, thanks for reading!
